Below is a list of stocks in the region and category/industry selected, ordered by PE ratio. A low PE ratio could be indicative of good value.

symbol	longName	sector	industry	currency	currentPrice	marketCap	trailingPE	forwardPE
ACL.AX	Australian Clinical Labs Limited	Healthcare	Diagnostics & Research	AUD	3.44	698 Million	28.6667	15.1455
CUV.AX	Clinuvel Pharmaceuticals Limited	Healthcare	Biotechnology	AUD	13.62	682 Million	19.4571	17.1254
NEU.AX	Neuren Pharmaceuticals Limited	Healthcare	Biotechnology	AUD	14.8	2 Billion	15.2577	28.9046
CSL.AX	CSL Limited	Healthcare	Biotechnology	AUD	271.36	134 Billion	32.1136	34.7578
PNV.AX	PolyNovo Limited	Healthcare	Medical Devices	AUD	2.05	1 Billion	205	68.7228
TLX.AX	Telix Pharmaceuticals Limited	Healthcare	Biotechnology	AUD	23.02	8 Billion	153.4667	74.2677

In simple terms, a good P/E (Price divided by Earnings) ratio for an established company is lower than 20 (average across regions and industries is usually 20-25). When looking at the P/E ratio alone, the lower it is, the better. It is however more meaningful to compare P/E Ratio for a stock to the average of the sector/industry from which it derives the majority of its income. Also note that it is difficult to set guidelines for startups where future earnings are quite uncertain.
